QR CODES
Let's make a QR Code

1. Visit the website, QR Code Generator at http://www.qrstuff.com/
2. Identify what type of data you will connect to your QR Code.
   a. For this project you will use a URL (web site address)
   b. You could add contact information (e-mail address, etc.)
3. Select the Static encoding option
4. Select your foreground color.
   a. Pick a color that will show up.
   b. IF you are not printing in color pick black/blue, something dark
   c. You must have $ to print in color. You do not have to have a color QR Code.
5. Select DOWNLOAD for you output.
6. A small box will appear at the bottom of your screen. Select OPEN.
7. Your QR Code will appear.
   a. Right click on the QR Code
   b. Copy
   c. Paste the image into word.
   d. PRINT & SAVE
