

Instagram China's Regions

Objective: Show the differences in China's regions and give details about each by drawing Instagram pictures for each. Use the notes we took in class and your text for help. **Due at end of hour!**

Project Checklist

Top:

_____ **Profile Picture** - illustration of yourself, colorful

_____ **Profile Name** - Create a username for yourself (that includes your first name)

_____ **Location**- Name of your region (Tibetan Plateau, Gobi Desert, Taklimakan Desert, or North China Plain)

Middle

_____ **Photo** -Colorful, detailed illustration that accurately "shows" your region in China

_____ Include 3 details, labeled in picture

Bottom

_____ **"Likes"** section- 2-3 names of other Instagram users that would feel compelled to comment on that region

_____ **Comment section**- a comment by YOU that gives more information about what you're seeing/experiencing in this region... Add Hashtags to make it creative and authentic!

FYI- A 'Hashtag' is an easy way to categorize, find and join conversations on a particular topic. The **hashtag** is used to highlight keywords or topics related to an area of exploration. An example might be #FloodingProbz (for the North China Plain because it's been recorded to have flooded over 1500 times!)

Total Points: 15

Anatomy of an *Instagram*
